Shivajirao S Jondhale College of Engineering, Dombivli (E) (Affiliated to
University of Mumbai, Approved by AICTE)

Our institute has a vision to impart a quality technical education for creating competent and ethically strong professionals. College intends to provide a friendly and healthy environment to students. Institute has developed some of the best practices to achieve the vision and mission. Two of the practices are elaborated here are:

Best Practice 1:

1. **Title of the Practice:** Smart India Hackathon Cell

2. **Objective:**

- Harness ingenuity and capability of students.
- Build pathway for Startup India campaign.
- Sourcing solutions for improving quality of life and facilitate governance.
- Provide opportunity to students to provide innovative solutions to India's unapproachable problems.

3. **The Context:**

Smart India hackathon is a 36 hours ceaseless digital product building competition, during Which student teams from all over India race to offer innovative solutions in order to make our nation a highly advanced, developed and prosperous one.

4. **The Practice:**

Every year Smart India hackathon cell of our institute organize internal hackathon competition for different teams. Judges select two or three best teams to represent our institute in Smart India hackathon competition. Cell also organizes workshop for selected teams to groove up their skill.

5. **Evidence of Success:**

Participants list enclosed below.

6. **Problems encountered and resources required:**

Now a days very few students are focused so it is difficult to prepare Students for participation in such marathon coding competitions.

Events: Internal Hackathon

Venue: Seminar Hall, F Building

Date : 12th march 2022

A hackathon is a competitive event where programmers, developers, and others involved in software and hardware development collaborate actively on software or hardware projects. It's an innovation marathon, where the participants create solution to Real-Life problem. The Smart India Hackathon (SIH) is a nationwide initiative of the Government of India to provide a platform for students to solve some of the critical problems we face in our daily lives. The aim is to challenge students to think outside the box and provide innovative ideas to create intelligent applications that will help to improve the lives of millions of Indians. Internal hackathon is conducted within the college to select best teams to send them for the grand finale. This gives students an opportunity to think outside of the box and helped them to develop team skills for their future ventures.

Judging Process:

Once a team comes forward to present the solution of their problem statement before the jury panel, they are taken through a question-and-answer session where each and every member is asked questions about the project and they are assessed according to their understanding of the project.

- First round of evaluation, 4 judges for team evaluation (10 min per team, 7 min presentation and 3 min Q & A).
- Expert mentoring session 5-7 minutes per team.
- Second round of evaluation, 4 judges for team, evaluation based on evaluating implementation of ideas.

Evaluation based on the following factors:

1. Innovativeness of proposed solution.
2. Clarity and details in prescribed format.
3. Knowledge.
4. Feasibility of proposed solution.
5. Scale of impact.

Judges Details:

1. Mr. Raj Nikam,
Designation: Software developer
Company name: We3 Tech Works
2. Mr. Akshay Rahate
Designation: Open-Source Engineer
Company name: Voltron Data
3. Dr. Uttara Gogate
HOD, Computer Engineering Department
4. Dr. Bhavana Thakur, Associate Professor and Dean R&D
EXTC Department.

Judging Process:

Once a team comes forward to present the solution of their problem statement before the jury panel, they are taken through a question-and-answer session where each and every member is asked questions about the project and they are assessed according to their understanding of the project. The significant factor of the judging process is how explicit yet how brief the presentation is made. The judges then assign the marks according to the above discussed factors.

- First round of evaluation, 4 judges for team evaluation (10 min per team, 7 min presentation and 3 min Q & A).
 - Expert mentoring session 5-7 minutes per team.
 - Second round of evaluation, 4 judges for team, evaluation based on evaluating implementation of ideas.
- Evaluation done based on the following factors:
1. Innovativeness of proposed solution.
 2. Clarity and details in prescribed format.
 3. Knowledge.
 4. Feasibility of proposed solution.
 5. Scale of impact.

Judges Details:

BEST PRACTICE 2:

Title of the Practice: Student Research Paper Publication and Innovation

Objective:

- To inculcate research culture among students to build pathway for Higher Studies and Startup India campaign.
- To improve thinking capability and develop engineering skills.
- Provide opportunity to students to work in team.
- To allow students to understand research practices and methodology.
- To encourage Students to publish their research in academic journals or present at conferences, which gives them the opportunity to share their findings with a wider audience and contribute to the academic and professional community.

The context:

Our institute is affiliated to university of Mumbai. As per university syllabus final year students have to complete one project. Our institute made a policy that final year students should undertake a research project which involve latest innovations to solve the challenges in our country. Students have to study this paper and try to implement. Students should understand research methodology and try to publish paper.

The Practice:

To encourage Final year students to get involved in engineering research and possibly pursue higher studies, we ask them to select some research papers of their interest. They have to understand concept and overview of paper, its equation, code, figures if any and regenerate its result/solution. Once they achieve result, they need to give presentation in team and have to publish paper on it. We encourage them to participate in various project competitions or national conferences. This entire process help student to develop engineering skills that will serve them for their entire careers, including ability to work in teams. With this they also understand to find design solutions that address real world need. By fostering this environment of research and innovation, our institute is giving students a strong foundation to succeed in both academic and professional pursuits. Their work could go on to contribute meaningful innovations in key areas, which is essential for addressing the challenges facing India and world today.

Evidence of Success:

Some of Paper published in year 21-22 ,22-23 and 23-24 are evidence of success.
